DETAILED ACTION

Response to Arguments

Applicant's arguments, see Remarks, filed 9/29/08, with respect to claims 5, 10, 13, and 15-20 have been fully considered and are persuasive. The previous grounds of rejection have been withdrawn.

Regarding the previous rejection of claim 13 under 35 USC 101, this claim has been cancelled rendering the previous rejection moot.

Regarding the previous rejections of claims 5, 10, and 15-20 under 35 USC 112, second paragraph, the applicant has amended claims 5, 10, and 15 solve the issue of indefiniteness in the claims.

The claims are now in condition for allowance.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Leonid Thenor on 1/15/08.

Title:

"REPRODUCING APPARATUS, PROGRAM AND RECORDING MEDIUM" has been amended to **--"REPRODUCING APPARATUS UTILIZING RECORDING MEDIUM IDENTIFIER"--**.

In the Claims:

Regarding claim 15:

"A recording apparatus for reproducing information stored on a recording medium" has been amended to **--"A reproducing apparatus for reproducing information stored on a recording medium"--**.

Allowable Subject Matter

Claims 5, 10, and 15-20 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims 5, 10, 15.

Regarding claim 5, the prior art taken either singularly or in combination fails to anticipate or fairly suggest a reproducing apparatus which reproduces information recorded on a recording medium, comprising: a pickup which reads information including recording medium identifier information, a first content, and a second content recorded on the recording medium, wherein both the first content and the second content are audio visual information; a reproducing signal processing circuit which reproduces the information read by the pickup; a memory which stores a plurality of recording medium identifier information sets which have ever been processed by the

reproducing signal processing circuit; and a controller which controls the reproducing apparatus; wherein the recording medium identifier information includes an ID unique to the recording medium; wherein the controller permits reproduction of the second content when the recording medium identifier information stored in the memory satisfies a predetermined requirement; wherein the first content can be reproduced whether or not the recording medium identifier information satisfies the predetermined requirement, and ***wherein the predetermined requirement includes a number of the recording medium identifier information sets, stored in the memory, that are required to reproduce the second content.***

Regarding claim 10, the prior art taken either singularly or in combination fails to anticipate or fairly suggest a reproducing method for reproducing information which includes recording medium identifier information, a first content, and a second content recorded on a recording medium, comprising the steps of: reproducing recording medium identifier information that includes an ID unique to the recording medium; storing a plurality of recording medium identifier information sets which have ever been processed; reproducing the second content when the recording medium identifier information stored in a memory satisfies a predetermined requirement; and reproducing the first content whether or not the recording medium identifier information satisfies the predetermined requirement; wherein both the first content and the second content are audio visual information, and ***wherein the predetermined requirement includes a number of the recording medium identifier information sets, stored in the memory, that are required to reproduce the second content.***

Regarding claim 15, the prior art taken either singularly or in combination fails to anticipate or fairly suggest a reproducing apparatus for reproducing information stored on a recording medium, the information comprising: recording medium identifier information for identifying the recording medium; a first content; a second content; wherein both the first content and the second content are audio visual information, and wherein the recording medium identifier information includes an ID unique to the recording medium; and a program which controls the reproducing apparatus to execute the steps of: reading out the recording medium identifier information stored in the reproducing apparatus; and reproducing the second content when the recording medium identifier information read out from a memory satisfies a predetermined requirement, ***wherein the predetermined requirement includes a number of the recording medium identifier information sets, read out from the memory, that are required to reproduce the second content.***

Dependent claims 16-20 are allowed with their respective base claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
